

ABOUT ME

As an adept web developer, I bring a robust two-year tenure with Indutech IT Solutions to the table. My proficiency spans across key technologies such as Laravel, HTML, CSS, and JavaScript, complemented by advanced skills in ReactJS and MySQL. I excel in both backend development and frontend design, ensuring that web applications operate with seamless functionality. My technical acumen and dedication to excellence make me a valuable asset to any team seeking to create cutting-edge web solutions.

Jan 2023 - Present

Trainee

I spent the first two months learning the basics of C programming, and then the next four months enhancing websites using HTML, CSS, and JavaScript.

Internship

Learned Laravel over 6 months, worked on a stipend-based small project, and continued practicing.

Internship

Learned ReactJS and Figma over five months, completed a project and continued practicing while working for a company.

Web Developer

Since January 2023, I've been working independently as a web developer on live projects, including prototyping, creating admin panels, and developing dynamic websites.
